

I am discouraged to hear about the consideration to cut funding for Video Relay interpreting. IT is a valuable tool for the Deaf community, a tool that is just beinging to be utilized. I am sure that the Deaf community will continue to use VRS. In order to avoid long waits and short hours of service, please continue to fund VRS properly. If you do not, VRS providers will not be able to properly provide enough qualified sign language interpreters/operators. Thank you.
